

**REMARKS**

**I. Amendments**

The specification is amended to include the priority information on page 1.

Claim 1 is amended to recite a method of "delivering an affinity moiety" to a subject. Basis is found, for example, on page 10, line 6 to page 11, line 2. Claim 1 is also amended to describe that allowing the administered liposomes is effective to cause release of at least a portion of the cleavable linkages, as supported on page 17, lines 17-23. Claim 1 is also amended to remove the term "systemically", as supported for example on page 39, lines 7-8.

Claim 2 is amended to remove the term "reducible", since ester and peptide linkages cleave not by reduction. Claim 2 is also amended to include the term "linkages" for clarification.

Claims 3, 8, and 9 are amended for consistency with claim 1.

Claim 6 is amended to alter the dependency and correct a typographical error.

Claim 13 is amended to include the limitations of claim 19.

Claims 14 and 15 are amended for consistency with claim 13.

If the Examiner has any questions or believes a telephone conference would expedite prosecution of this application, the Examiner is encouraged to call the undersigned at (650) 838-4402.

Respectfully submitted,

Date: Nov. 18, 2003
